Ayurveda

" Mecca of Avurveda"(Kerala) Avurvedic the ancient skill of healing methods, Kerala is famous for its alternative medical therapies such as Ayurveda, which help to rejuvenate and revitalize the body, what many tourists have now discovered that.

Kerala has a pool of trained doctors and nurses and an excellent network of hospitals that offer international standard treatments at very affordable prices

It includes in its consideration, longevity, rejuvenation and self-realization therapies through herbs, diet, exercise, yoga, massage, aromas, 'tantras', 'mantras' and meditation, it is an approach to physical health, mental clarity and spiritual fulfilment. when Man, by going against Nature, opens the gateway to diseases.

Ayurveda offers a system of cure which runs parallel to Nature.

This holistic approach aims at establishing harmony of Body, Mind and Soul, leading to fulfilment and bliss even in this lifetime. Ayurvedic treatment is primarily of two types: Saman and Sodhana. Samana is basically a process of pacifying and soothing the bodily ills. Sodhana involves a process of purification, of uprooting ailments from the body.

AVURVEDA OFFERS : Body Immunisation, Body Sudation, Body slimming, Panchakarma Theropy. Pizhichil,. Njavarakizhi, Dhara, Vasthi, Shirovasthi Udvarthanam, Abyangam, Nasyam, Snehopanam and Kizhi.

medictour

Shirovasti

One of the Ayurvedic treatments, which is considered more of a palliative treatment of ayurveda than an eliminative one. In this process, medicated oil is poured into the sleeve and allowed to remain on the pate for a while. The oils commonly used are Ksheerabala or Dhanwantaram. How long the oil to be kept on the head is determined by the severity of the illness

Podikizhi

an Ayurvedic therapy in which the body of the patient is fomented with linen bags containing a mixture of horse gram, black gram, gingelly seeds and other vital ingredients in powdered form.

Nasya

Nasya is medication through the nose. In this treatment, the application of medicated oil or powders through the nostrils. Nasya are of four types Virechana Nasya, Dhmana Nasya, Brumhana Nasya and Shamana Nasya.

Urovasti

Urovasti is an Ayurvedic treatment to Kativasti and Urovasti is administered to the Uras or the chest to treat pain in the sternum area. Similar to that in Kativasti, a reservoir is built upon the chest with black gram paste.

Abhyanga

Abhyanga in Ayurveda means oil massage. A person can do A bhyanga on his own as part of his daily routine for health, trained masseurs are required to perform this therapy when it is used for disease management in ayurveda or Panchakarma.

Dhara

Dhara is one of the major oil therapies in Ayurveda treatment. In this continualpouring of warm medicated oil or a herbal decoction over the body is done. Dhara is a kind of external application of medicated liquids. Popular Dhara treatments are Shirodhara and Sarvangadhara Instead of oil medicated buttermilk is used in Takradhara therapy

Swedana

Swedana or Sudation Therapy is a pre-requisite for Panchakarma. This process involves inducing sweat in the patient. Swedana gives relief from health problems like asthma, catarrh, hemiplegia and many other diseases caused by Vata disorders.

Shirovasti

Shirovasti or therapeutic enema on the head is said to be one of the major external oil therapies for vata related ailments. Shirovasti is suggested for diseases like facial paralysis, cataract, earache, insomnia and disorders of the cranial nerves.

Talapotchil

Talapotchil in Ayurveda treatment involves covering of the head with medicinal paste. Talapotchil is an important treatment for many minor and major diseases that afflict the head.

Kativasti

Kativasti is an ayurvedic therapy to cure lower backache, stiffness, and pain felt down the back. Oil mixed with black gram dough is placed on the patient for an extended duration.

Karnapoorana

Karnapoorana is an Ayurvedic treatment suggested for a wide range of ear-related and cranial issues. In this process lukewarm, purified medicated oil is gently poured into the ear facing up. After remaining in the same position for about five minutes, the process is repeated in the other ear.

Dhara

Shirodhara, also known as Moordhanyadhara, is done with oil in Ayurveda. Dhara's are done using oil medicated with herbs, tender coconut water, milk, ghee, Dhanyamla (an extraction of cereals and citrus fruits) or buttermilk.
